

Optimize Your Operation's Unique Capabilities

recognize economy

Your operation isn't the same as everyone else's. That's why HA International customizes each and every resin coated sand formulation so you can reach the optimal performance at your facility to ultimately reduce scrap rate and increase throughput.

recommit to ecology

Empowered by SAP, we produce and manufacture your products to their exact specifications. We've extended our product line to include environmentally compliant formulas to reduce ammonia and formaldehyde emissions by 30% and 60% from conventional formulas. Our representatives are trained to provide you with the right products and knowledge to bring your operation to its highest efficiency. These days it's about getting the right product match to maximize what's best for your facility and our environment.
