

# *HAI Resin Tote Fittings*

- All Foundry Resin totes utilize a Cam-Lock fitting system.
- All Part 1 resins are 2" fittings, totes have white corners.
- All Part 2 resins are 1.5" fittings, totes have red corners.
- All Techniset Activators and ALpHACURE hardeners are 1.5" fittings.
- Only connect to Cam-Lock with appropriately sized female fitting, never use the dust-cap threads. The dust cap threads can vary, but the Cam-Lock will be correct (either 2" or 1.5").
- Female Cam-Lock fitting slides over top of male fitting and locks into the indented slot on the male fitting. No threading is involved to connect.
- Appropriate female connectors can be purchased from McMaster-Carr:
