

Reducer E63

Product Features

Reducer E63 is a VOC-Exempt solvent for solvent based refractory coatings. It is specifically designed for the EcoLite series of low VOC coatings. Compatibility should be verified before use with non-EcoLite coatings. When diluting any coating it is imperative that the coating be remixed to a homogenous consistency after solvent addition. Reducer E63 is a fast air drying solvent, but it can also be dried by light-off. When ignited Reducer E63 is a cool burning solvent.

Typical Physical Properties

Specific Gravity	1.060-1.080
Color	Clear
Purity	99.5% min

Performance Characteristics

When diluting a coating with Reducer E63 it is imperative that the containers be properly grounded during solvent transfer to avoid static buildup. Coating should be mixed to a homogenous consistency after solvent addition. To reduce the potential for blistering, coatings should be allowed to dull or lose their gloss after application and before lightoff.

Storage Guidelines

Reducer E63 is classified as a Flammable Liquid, avoid storage at high temperatures and all sources of sparks or ignition

Safe Handling

Reducer E63 is flammable liquid that contains ethyl alcohol. Refer to the Safety Data Sheet for additional information.

Technical Service

Let HA International be “The Best Total Solution” for your foundry by providing innovative products, in-depth technical assistance, and a diverse product line specially formulated for any foundry application. Both our in-house and field experts are available to assist you with your most challenging foundry applications. Contact your sales representative for additional technical information.
